

# ASPHALT RELEASE-OB

## TECHNICAL DATA SHEET

**Description:** *HYDRO-CHEM SYSTEMS* has developed an **Asphalt Release-OB** agent using the newest technologies available. State DOT's as well as the USDOT sometimes require new formulations and new polymers to make the asphalt. HCS's **Asphalt Release-OB** is specifically developed for use with polymer modified asphalts as well as conventional hot mix asphalt. **Asphalt Release-OB** has **NO** Terpenes, **NO** Petroleum Distillates.

### Advantages:

- Biodegradable.
- Eliminates need for environmentally unfriendly solvent & fuel oil release agents.
- Economical.
- Safer than using fuel oil or solvents.
- Will not interfere with performance of asphalt.
- Only need one type release for all asphalts.
- For use on transport vehicles, spreaders, dump trucks, asphalt spraying equipment, or any other equipment used to prepare asphalt mixes and any other asphalt and tar handling equipment.
- Not Flammable, Flash Point of 377°F.

### Specifications:

Physical Form: Green color Liquid  
Solubility: Turns milky in water & will separate.  
Foam: None

**Directions:** For best results, clean equipment thoroughly before applying release agent. The product should be diluted 5 – 30 parts water to 1 part Asphalt Release-OB, depending on the type of asphalt. For polymer type asphalt, a dilution rate of 5:1 – 10:1 will be effective. Apply in fine mist or spray covering all areas completely.

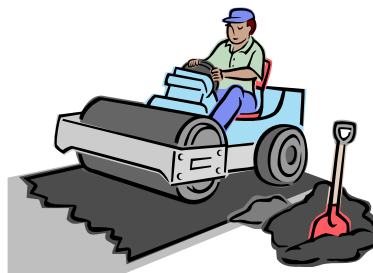

Best Results are obtained by using a proportioning sprayer operated by water pressure. If an air sprayer or pump-up sprayer is used, the diluted Asphalt Release-OB may need to be stirred or shaken.

### Caution:

**Asphalt Release-OB is considered non-toxic when used according to instructions.**

**If accidentally splashed in eyes, flush with cold water for 15 minutes and call physician.**

- ◆ **KEEP AWAY FROM CHILDREN**
- ◆ **DO NOT TAKE INTERNALLY**
- ◆ **FOR COMMERCIAL/INDUSTRIAL USE ONLY**
- ◆ **THE PURCHASER OF THIS PRODUCT ASSUMES ALL RISKS AT ALL TIMES.**
